

SCOT JCB

# 3T SWIVEL

## Key Specifications

Specification	Unit	
Gross Engine Power	kW	32.4
Payload	KG	3,000
Unladen Weight	KG	2,330
Skip Capacity (Heaped)	Ltr	1,880
Overall Length	MM	3,952
Wheel Base	MM	1,939
Minimum Ground Clearance	MM	279
Height to front lip of skip (untipped)	MM	1,467

## Reasons to Rent

### Engine Solution

Engines throughout the range are water-cooled and optimised to deliver optimum power and torque across the whole rev range.

### Serviceability

Essential to any rental customer, JCB site dumpers feature best-in-class ground level service access with chassis and engine canopies. LiveLink keeps accurate records of engine hours, maintenance history and service alerts for improved maintenance planning.

### Ease of Use

JCB Site dumpers are designed for ease of operation, utilising automotive-style controls and a clear uncluttered dashboard.

### Versatility

The JCB 3T dumper offers Swivel tip which allows loads to be rotated through 90° to either side of the machine before tipping.

### Utilisation

Heavy-duty damage-resistant articulated chassis and skips help your machine to withstand the most arduous conditions. These dumpers articulate and oscillate centrally, which maximises strength and reliability. Hoses and hydraulic componentry are located intelligently so that they get the maximum possible protection from site damage whilst remaining easy to service.
